

Animal Disposal Following an Emergency

Most states have their own guidelines on disposal of dead animals, so people with questions regarding the specific situation in their state are highly encouraged to contact local or state health and agricultural officials for clarification.

Frequently Asked Questions

Are there any special health risks I need to be aware of when disposing of dead animals?

The risk to humans from animal carcasses is low if proper precautions are taken.

- Practice proper hand washing to prevent infection with certain pathogens that may be transmitted from farm animals, including *Salmonella* and *E. coli*.
- Secure all food sources and remove any animal carcasses to avoid attracting rats.
- Wear insect repellent when outdoors. Emergencies such as natural disasters may lead to more mosquitoes, which can carry disease.

People working to clean up areas containing swine or poultry carcasses should take the following precautions:

- Wear protective clothing, including waterproof gloves, waterproof boots, and protective eyewear (cover any open wounds).
- Use duct tape to seal tops of gloves and boots to prevent water seepage.
- Wear respiratory protection—an N-95 respirator or better.
- If you smell hydrogen sulfide (a rotten egg smell), get out of the building and call your county extension office.
- Clean and disinfect all clothing and boots after handling carcass-contaminated materials.
- Wash work clothes separately from street clothes.
- Wash hands thoroughly before placing fingers in mouth (nail biting, etc.).
- Shower and wash hair thoroughly after handling carcass-contaminated materials.

How do I dispose of a dead animal on my property during flood cleanup?

It is usually the responsibility of the owner or person in charge of domesticated animals to appropriately dispose of dead animals in accordance with local or state ordinances within 24 hours after knowledge of the death. It can be the responsibility of the municipal or county government to designate appropriate people to dispose of any domestic dead animals whose owner cannot be identified.

Contact your local animal control department, local health department, or state veterinarian for specific disposal guidance.

Animal Disposal Following an Emergency

(continued from previous page)

My pet was killed in the flood. Can I bury it on my property?

Several cities require Animal Care and Control agencies to manage the disposal of family pets and other dead animals, except for livestock. Check with your local authorities for more information.

If not, how do I dispose of the remains?

1. Wear gloves.
2. Cover your gloved hand with a plastic trash bag, pick up the remains, then invert the trash bag over the remains and seal the bag.
3. For larger animals, use a shovel to place remains inside a plastic trash bag, then rinse off the shovel with water.
4. Call your local animal care and control agency for further instructions and to request pickup.
5. Wash your hands.

I am a farmer and I lost a lot of livestock during the flood. How do I dispose of multiple animal remains?

Each farm operation should have specific plans for animal disposal in the event of an emergency. Farm operations should check with state and local authorities to ensure their plan meets local requirements.

In addition, the [US Department of Agriculture \(USDA\) Animal and Plant Health Inspection Service \(APHIS\)](http://www.aphis.usda.gov/) (<http://www.aphis.usda.gov/>) can provide technical advice and assistance on the effective disposal of animal carcasses. The main phone number for the APHIS Emergency Management Staff in Riverdale, Maryland is 301-734-8073. Local phone numbers may be established in the event of an emergency response.

These guidelines are intended to address dead animal disposal during a declared emergency. They do not take the place of the dead animal disposal that occurs under the normal permitted operation of a farm.
